TASK: Fix the layout and the intro of THE CHARGE section (src/sections/Charge.jsx).
Touch nothing else (hero, buy button, other sections, config.js). No new
dependencies. Do not reword any text: keep every string from copy.js exactly as it
is, only change layout, styling and animation. Animate only transform and opacity.

CURRENT PROBLEMS (all must be fixed)
1. A big empty gap sits between the headline and the content.
2. The HOLD TO CHARGE button covers the bottom of the wall.
3. After the newspapers slide away, a faint ghost of them (and of the peek bull)
   stays on screen over the wall.
4. The red stamp covers the newspaper text, and small texts overlap each other.
5. The bull-peek image looks pasted on: its bottom edge is cut flat and the cut
   is visible on top of the paper.
6. The headline area goes blank for a moment when the text changes.
7. The floating sound button overlaps the end of the progress bar.
8. The progress bar is a gradient. The site uses flat colours only.
9. The newspapers extend past the left and right edges of the screen.

1. SECTION LAYOUT
- Section height: calc(100dvh - var(--ticker-h, 0px)), where --ticker-h is the
  real height of the fixed bottom ticker (0 if there is none). min-height 560px.
  Use dvh, not vh. overflow-x: clip.
- CSS grid with 3 rows: [headline: auto] [stage: minmax(0, 1fr)] [controls: auto].
  row-gap: clamp(8px, 2dvh, 20px). Padding: clamp(16px, 3dvh, 32px) 16px 0.
- Headline row: Anton, uppercase, centered, font-size clamp (26px, 7.4vw, 52px),
  line-height 1.02, min-height 2.1em (two lines reserved) so the layout never jumps
